PROFESSIONAL SUMMARY

Full-Stack & AI Developer who turns real business problems into production software. 3+ years of experience across TypeScript and PHP stacks (React, Next.js, Node.js, Laravel) and Python/FastAPI, now focused on LLM features with Claude and OpenAI APIs: RAG chatbots, AI recommendations, document summarization and n8n agents with human review.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, React Native, Tailwind CSS

Backend & Data: Python, FastAPI, Node.js, REST APIs, PHP, Laravel, Supabase, PostgreSQL, MySQL, MongoDB

AI & Automation: Claude API (structured outputs, tool use, web search), OpenAI API, Gemini, LangChain, RAG, pgvector, streaming responses, prompt engineering, LLM evaluation, AI agents, n8n, human-in-the-loop, Claude Code, Codex

Cloud, DevOps & Testing: Vercel, Render, Linux / Cloud VPS, Docker, Git, GitHub Actions (CI/CD), pytest, Playwright, Jest, SSH, WordPress, SEO

PROFESSIONAL EXPERIENCE

Full-Stack & AI Developer | Saturday Education Consulting, Bangkok — Oct 2025 - Present

Study-abroad consulting company | Live platform in active development: saturdayeducation.com

- Led development of the company's study-abroad platform in 5 languages with Next.js, TypeScript and Supabase, with search across 700+ universities and 60,000+ courses and an admin dashboard for students, universities and leads.
- Designed psychometric career assessments that generate AI career and university recommendations and send counselors a profile report of each student's interests, skills and personality, cutting consultation prep time.
- Shipped a RAG-based AI university-advisor chatbot grounded in the platform's university and course data, plus document summarization and PDF report generation.
- Built an n8n agent on the Claude API that reads incoming university partnership emails, extracts the requested information into structured fields and drafts replies for human approval, cutting reply time from ~20 to ~3 min per email.

Freelance Full-Stack Developer | Client Projects, Bangkok — May 2024 - Present

Think Asia Education: education consultancy website — thinkasiaeducation.com

- Built the company's brand website in Next.js, TypeScript, Supabase and Tailwind CSS, including an online practice test for the CSCA (China's university admission exam for international students) with a question bank for Chinese, Maths, Physics and Chemistry, automatic scoring and results.

Siribaan Property Group: real estate platform (live) — siribaanproperty.com

- Built and deployed a fast-loading property platform with listing search, detail pages, inquiry capture and animated, responsive UI, plus an admin panel managing 50+ listings.
- Set up the Supabase database and media storage; handled deployment on Vercel and fixed production issues.

Other clients: smaller projects and contributions, including a Google Pay payment integration, SEO improvements, WordPress websites and frontend features for a React Native mobile app.

Full-Stack Developer | mmRoute Technologies, Yangon, Myanmar — Oct 2022 - Feb 2024

- Built responsive, mobile-friendly business websites with PHP, JavaScript, HTML and CSS.
- Integrated third-party APIs and payment gateways; handled performance, SEO, security updates and backups.

Junior Full-Stack Developer Intern | Clouud Solutions, India — Dec 2021 - Feb 2022

- Developed and tested features for a client CRM using Laravel, Vue.js, Inertia.js, MySQL and Tailwind CSS, working alongside designers and product managers.

PROJECTS

JobFit AI | AI job-matching web app (live) — jobfit-ai-plum.vercel.app · GitHub

- Scores any job against a resume (0–100 fit, skill gaps, deal-breakers), streams a tailored cover letter, and searches any city's job boards to rank current postings by fit.
- Python, FastAPI and Pydantic backend on the Claude API (structured outputs, web search, streaming); Next.js and TypeScript frontend; LangChain and pgvector for RAG.
